MICROCOMPUTERS IN CIVIL ENGINEERING

VOLUME 3, NUMBER 1, MARCH 1988

CONTENTS

Automation of Knowledge Organization and Acquisition
X. J. ZHANG and J. T. P. YAO
1

Logistics Decisions Following Urban Disasters
A. G. HOBEIKA, S. A. ARDEKANI and D. L. HAN
13

A General Model for Providing Active Computer Support to Design, Planning, and Management
M. L. MANHEIM
29

Real Time Vehicle Systems Monitoring
G. B. HAMILTON and M. KIRSHENBLATT
45

A Production System Model for Terrain Analysis Knowledge Representation
D. P. ARGIALAS and R. NARASIMHAN
55

REVIEW ARTICLE
Expert System Tools for Construction Planning and Control
O. MOSELHI and M. J. NICHOLAS
75

MICROCOMPUTERS IN EDUCATION
Teacher-Friendly Transportation Programs
R. HAMERSLAG
81

Book Review
91

Elsevier

MICROCOMPUTERS IN CIVIL ENGINEERING

VOLUME 3, NUMBER 2, JUNE 1988

CONTENTS

Extending Prolog to Provide Better Support for Design Code Expert Systems
J. THOMSON, S. BIRD, D. THOMSON, B. MARKSJO, and R. SHARPE
93

Developing Engineering Design Software Using HyperCard
M. ASGHAR BHATTI
111

Two-Level Finite Element Method for Thin Plates Subject to Concentrated Loads
A. Y. T. LEUNG and S. C. WONG
127

Determination of Principal Axes of Truss Towers
J. PIETRZAK
137

TUTORIAL
Formatted Spreadsheets for Engineers
S. F. STIEMER and D. LO
145

TECHNICAL NOTE
Development of a Decision Support System Using Fuzzy Sets
C. H. JUANG
157

MICROCOMPUTERS IN EDUCATION
Temperature and Vapor Pressure Gradients Across Wall Assemblies Using Microcomputer Graphics
P. FAZIO and K. GOWRI
167

(*continued*)

Elsevier

A Cellular Analogy for the Saint-Venant Torsion Analysis of Solid and Hollow Sections
D. JOHNSON
173

Book Review
179

Announcements

MICROCOMPUTERS IN CIVIL ENGINEERING

VOLUME 3, NUMBER 3, SEPTEMBER 1988

CONTENTS

A Microcomputer-Controlled Probe Traversing Mechanism and Data Acquisition System for Wind Tunnel Studies
E. SAVORY and N. TOY
181

An Expert System to Evaluate Concrete Pavements
M. ALSHAWI and J. G. CABRERA
191

An Expert System for Evaluating Multicriteria Transportation Networks
H.-L. LI
199

Parallel Mixed-Time Integration Methods for Unsteady Heat Conduction
P. SMOLINSKI
215

Interactive Optimization of Multispan Plate Girders
H. ADELI and K. V. CHOMPOOMING
227

Bending of Rectangular Plates with Variable Rigidities
I. E. HARIK and D. R. SFEIR
245

SHORT CONTRIBUTIONS
Computer Adaptation of Newmark's Charts
D. E. SUTCLIFFE and A. P. S. SELVADURAI
257

Nonlinear Spatial Equilibrium Algorithms: A Computational Comparison
P. C. JONES, G. MORRISON, and J. C. SWARTS
265

Elsevier

MICROCOMPUTERS IN CIVIL ENGINEERING

VOLUME 3, NUMBER 4, DECEMBER 1988

CONTENTS

Editorial
H. ADELI
273

A Fast Buckling Analysis of Statically Indeterminate Variable-Section Struts
R. GORI and B. A. SCHREFLER
275

Verification Tests for Computer-Aided Structural Analysis
R. J. MELOSH and S. UTKU
289

An Expert System to Analyze Hazardous Intersections
G. SPRING
299

PROGRAMMING CONTRIBUTION
Solving the Biaxial Bending Problem in Reinforced Concrete by a Three-level Iteration Procedure
C. K. WANG
311

REVIEW ARTICLE
Combining Expert Systems and CAD Techniques
D. JAIN and M. L. MAHER
321

Knowledge-Based System Development Tools for Processing Design Specifications
P. FAZIO, C. BEDARD, and K. GOWRI
333

Elsevier

MICROCOMPUTERS IN EDUCATION
A Knowledge-Based System for Planning a Construction Operation
T. P. WILLIAMS and R. KANGARI
345

Book Review
355
